

Square Smooth Fiberglass Column with Tuscan Capital and Base

We are committed to preserving the past with authentic, perfectly detailed columns using the latest technology. Our columns are made from specially formulated glass-reinforced polymers and a manufacturing process that has been tested in applications ranging from sporting products to the Aerospace industry. The shafts are one piece construction with a separate capital and base. Our customer service and high quality products make us a leader in the architectural column industry. Look to us for all of your fiberglass architectural needs.

Column benefits:

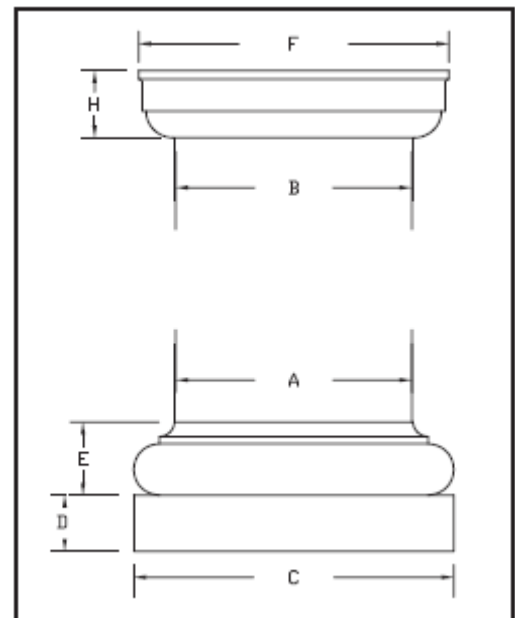

- Architecturally correct flutes
- Lightweight & easy to install
- Custom fit
- Lifetime warranty
- Low maintenance
- Load bearing capacity of 10,000
- Durable—will not rot or decay
- Protected against weathering, decay, insects and other environmental influences
- No ventilation required
- High impact resistance against construction abuse
- Services include splitting for reassembly for column cover applications to surround an existing support and pilaster applications
